Amendments to the Claims:

The listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

- 1. (Currently amended) A method for selectively shadowing only accesses to external storage media connected to a computer, the method comprising: detecting a data access to an external storage medium; and writing a copy of the accessed data to a storage location other than the external storage medium; wherein the detecting step comprises intercepting an I/O request from the computer to an external storage media drive in which the external storage media is inserted.
- 2. (Previously presented) The method of claim 1 wherein the access is a write operation.
- 3. (Previously presented) The method of claim 1 wherein the access is a read operation.
- 4. (Canceled)
- 5. (Currently amended) The method of claim [4] 5 wherein the I/O request is one of the group consisting of a file open or creation request, a write request, a file close request, a file system control request and a read request.
- 6. (Previously presented) The method of claim 5 further comprising: providing a proxy handler for the I/O request; and executing the proxy handler, in response to the detecting step.

- 7. (Currently amended) The method of claim [4] <u>1</u> wherein the computer runs under <u>a Windows an</u> operating system and the I/O request is one of the group consisting of IRP_MJ_CREATE, IRP_MJ_WRITE, IRP_MJ_CLOSE, IRP_MJ_FILE_SYSTEM_CONTROL and IRP_MJ_READ packets.
- 8. (Previously presented) The method of claim 7 further comprising: providing proxy handlers for the IRP_MJ_CREATE, IRP_MJ_WRITE, IRP_MJ_CLOSE and IRP_MJ_FILE_SYSTEM_CONT- ROL packets; and executing one of the proxy handlers, in response to the detecting step when the I/O request is a respective packet selected from the group consisting of IRP_MJ_CREATE, IRP_MJ_WRITE, IRP_MJ_CLOSE and IRP_MJ_FILE_SYSTEM_CONTROL packets.
- 9. (Previously presented) The method of claim 8 further comprising: providing a proxy handlers for the IRP_MJ_READ packet; and executing the proxy handlers for the IRP_MJ_READ packet, in response to the detecting step when the I/O request is an IRP_MJ_READ packet.
- 10. (Previously presented) The method of claim 1 wherein the storage location other than the external storage media is a protected storage location.
- 11. (Previously presented) The method of claim 1 further comprising: writing the data to the external storage medium after the step of writing a copy of the data to a storage location other than the external storage medium.
- 12. (Previously presented) The method of claim 1 further comprising: attaching to one or more file systems connected to an external storage media drive in which the external storage medium is inserted; and wherein the detecting step comprises intercepting I/O requests to the one or more file systems.

- 13. (Previously presented) The method of claim 1 wherein the external storage medium is selected from the group consisting of a floppy disk; a CD, a removable hard disk drive, and a zip disk drive.
- 14. (Previously presented) The method of claim 1 further comprising: collecting the copy into a database where similar copies are collected; and querying the database.
- 15. (Previously presented) The method of claim 14 wherein the database comprises records, each record comprising the copied data, a file name associated with the data, an identification of who initiated the data access, a station ID, and when the access was made.
- 16. (Previously presented) The method of claim 14 wherein the computer is connected to a computer network, and the detecting and copying steps are performed at the computer, and the collecting and querying steps are performed at another computer on the network.
- 17. (Previously presented) The method of claim 14 wherein the collecting and querying steps are performed by a user with administrator privileges.
- 18. (Currently amended) A computer readable medium on which is embedded computer software, the software performing a method, the method comprising: detecting a data access to an external storage medium; and writing a copy of the accessed data to a storage location other than the external storage medium; wherein the detecting step comprises intercepting an I/O request from the computer to an external storage media drive in which the external storage media is inserted.

- 19. (Previously presented) The computer readable medium of claim 18 wherein the access is a write operation.
- 20. (Canceled)
- 21. (Currently amended) The computer readable medium of claim 20 18 wherein the computer system runs under a Windows an operating system and the I/O request is one of the group consisting of IRP_MJ_CREATE, IRP_MJ_WRITE, IRP_MJ_CLOSE, IRP_MJ_FILE_SYSTEM_CONTROL and IRP_MJ_READ packets.
- 22. (Currently amended) An apparatus for selectively shadowing only accesses to external storage media connected to a computer, the apparatus comprising: a detector that receives intercepts I/O requests to an external storage media drive in which the external storage media is inserted; and a storage, other than the external storage medium, connected to the detector, in which a copy of the accessed data is written.
- 23. (Previously presented) The apparatus of claim 22 further comprising one or more proxy handlers connected to the detector, wherein the proxy handlers handle certain I/O requests.
- 24. (Previously presented) The apparatus of claim 23 wherein the certain I/O requests comprise IRP_MJ_CREATE, IRP_MJ_WRITE, IRP_MJ_CLOSE and IRP_MJ_FILE_SYSTEM_CONTROL packet.
- 25. (Previously presented) The apparatus of claim 24 wherein the certain I/O requests further comprise an IRP MJ READ packet.

Serial No. 09/884,921 Reply to Office Action July 22, 2005

- 26. (Previously presented) The apparatus of claim 23 further comprising: a list, connected to at least some of the one or more proxy handlers, in which file identifiers are contained.
- 27. (Previously presented) The apparatus of claim 26 wherein the file identifiers are IRP.FsContext values.
- 28. (Previously presented) The apparatus of claim 23 further comprising: one or more counters, connected to at least some of the one or more proxy handlers, by which certain file operations are counted.
- 29. (Currently amended) The apparatus of claim 23 wherein the computer runs under a Windows an operating system, and the one or more proxy handlers are connected to I/O request packet drivers supplied by the operating system.
- 30. (Canceled)
- 31. (New) The method of claim 1 wherein the external storage medium is selected from the group consisting of a floppy disk; a writable CD, a removable hard disk drive, and a zip disk drive.
- 32. (New) The computer readable medium of claim 18 wherein the external storage medium is selected from the group consisting of a floppy disk; a writable CD, a removable hard disk drive, and a zip disk drive.
- 33. (New) The apparatus of claim 22 wherein the external storage medium is selected from the group consisting of a floppy disk; a writable CD, a removable hard disk drive, and a zip disk drive.
